PETROL®
PETROL Instruments S.r.l.

AQUAMETRO®
FLOW MEASUREMENT SOLUTIONS

VESSEL AND TANKER OPERATIONS

Reliable measurement. Safer operations. Greater efficiency.

PETROL double case PD flowmeters

Custody transfer & fiscal measurement to ±0.15%

AQUAMETRO flow measurement

Electromagnetic, ultrasonic, turbine & Coriolis

14 DAYS

01 Order confirmed
Specification agreed and order placed.

02 Production & testing
Built, calibrated and tested to specification.

03 Shipping
Documentation prepared and goods dispatched.

04 Delivery
Within 14 days of order confirmation.

PROVEN MARINE APPLICATIONS

- OIL & CHEMICAL TANKERS
- LNG / LPG CARRIERS
- BUNKERING OPERATIONS
- OFFSHORE SUPPORT VESSELS
- FLEET & FUEL MANAGEMENT
- CARGO TRANSFER & METERING
- ENGINE ROOM FUEL
- PROCESS & UTILITY SYSTEMS

TRUSTED BRANDS. SUPERIOR SOLUTIONS.

Trusted measurement solutions for vessel and tanker operations

ACCURATE MEASUREMENT | SAFE OPERATIONS | MAXIMUM UPTIME

±0.15%
Accuracy on fiscal applications

±0.02%
Repeatability

2,000
m^3/h maximum flow rate

1970
Building PD flowmeters since

Key benefits

Enhanced safety
Accurate, repeatable measurement to prevent overfills, leaks and operational risk during transfer.

Improved efficiency
Real-time data for better decision making and smoother operations.

No wear by design
Floating rotors never touch each other or the measuring chamber, so accuracy does not drift with service hours.

Serviceable in place
The double case lets the measuring unit come out for checking without dismounting the meter from the line.

Global support
Backed by experienced teams and trusted partners worldwide.

Our products

PETROL — PD FLOWMETERS SINCE 1970

Italian-built positive displacement flowmeters for custody transfer and fiscal measurement — floating rotors, magnetic transmission and a double case you can service without breaking the line.

Double case PD flowmeters
1" TO 16" | 2,000 M³/H | 150 BAR | 250 °C

Single case PD flowmeters
1" TO 4" | 10 BAR | POCKETLESS

Counters & transmitters
MECHANICAL | PRESET BATCH | FISCAL | HART

Master meters & tank provers
±0.1% | 50–10,000 L | PORTABLE

Strainers & control valves
0.5" TO 16" | 40/80/200 MESH | BATCH CONTROL

AQUAMETRO — FLOW MEASUREMENT SOLUTIONS

Electronic flow metering, totalising and batch control for fuel, oil, water and process media.

Flow meters
ELECTROMAGNETIC | ULTRASONIC | TURBINE | CORIOLIS

Totalisers & controllers
BATCH CONTROL | DATA LOGGING | ALARMS

Specialist solutions
FUEL & OIL | WATER & WASTEWATER | CHEMICAL

Fiscal approvals & certification

Malaysia NMIM / SIRIM | **Indonesia** MIGAS | **Europe** MID / WELMEC | **Nigeria** DPR | **China** AQSIC (PAC) | **Russia** Metrological | **Greece** Hellenic | **Kazakhstan** Pattern

OIML R117 | API MPMS | PED 2014/68/EU | ATEX | ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018 | Lloyd's Register

Every meter is calibrated before delivery in a laboratory running four tank provers — 10,000, 5,000, 1,000 and 100 litres — attested by the Italian Metric Office. Approvals vary by model and configuration.
